

RENDER & PAINTED MASONRY ALGAE REMOVER & INHIBITOR

SAFE ON ALL RENDER TYPES & EXTERIOR PAINTED SURFACES

Advanced formulation specially developed for the removal of algae, moulds, lichen and green films from rendered walls and exterior painted masonry. Acts fast and effectively with no need for scrubbing, protecting surfaces from corrosion and damage.

- Removes algae & green films
- Non-corrosive formulation
- Inhibits future growths

DIRECTIONS FOR USE:

For best results remove any excess soiling with a brush or pressure washer, then allow surface to fully dry before applying Render & Painted Masonry Algae Remover & Inhibitor. Ready to use, do not dilute. Apply to surfaces with bucket and brush or a low pressure sprayer, applying at least 200ml of product per square metre.

Working Time: Leave to work for at least 36 hours, during which time green algae will be completely eradicated. Some types of algae and lichen may show discolouration for several days following treatment. Gentle surface cleaning will continue for weeks and months. Render & Painted Masonry Algae Remover & Inhibitor is also effective against black mould, however residual black/grey staining may remain after treatment. Precautions: Keep pets and children off treated surface until dry. Avoid contact with ornamental plants, lawns etc. If accidental contact occurs, rinse the affected plants with clean water. Do not allow run-off into ponds etc.

DANGER:

Keep out of reach of children. Dispose of contents/container in accordance with local regulation.
